## Primary datasets — USAC Open Data ([opendata.usac.org](https://opendata.usac.org))

All funding figures come from two public datasets maintained by the Universal Service Administrative Company (USAC), the nonprofit administrator of the E-Rate program under FCC oversight.

**E-Rate Recipient Details and Commitments** (`av18-svp9`) is the primary record of every E-Rate funding commitment, covering FY2016–FY2025. Each row represents one service delivered to one recipient site under one Funding Request Number (FRN). Fields include the billed entity number, recipient organization, service type, committed amount, post-discount cost, connection speeds, and recipient coordinates. The dataset contains approximately 21.5 million rows across 11 funding years.

**FCC Form 471 FRN Status** (`qdm-p-ygft`) tracks the lifecycle of every Funding Request Number from application through commitment and disbursement. The `total_authorized_disbursement` field — actual dollars approved for payment — is the measure used for all funding totals in these reports. USAC continuously updates prior-year rows as invoices are processed, so the most recent one or two funding years always appear lower than their final totals; FY2025 invoices are still being paid as of this writing.

## Historical data (FY1998–2015)

USAC's legacy commitment records for FY1998–FY2015 are no longer available on the public open-data portal. TPI downloaded and archived this dataset before it was removed; it now exists only in TPI's private BigQuery project and contains approximately 2.1 million rows. It provides the long historical baseline shown in the funding-history charts. Coverage varies — BEN-level totals are available for most of this period, but site-level recipient data becomes sparse before FY2010.

## Spending analysis metrics (this report)

**Total** columns show total authorized disbursements per billed entity (BEN) from FRN Status — entity-wide exact totals, not per-site estimates. **Students** and **NSLP** counts come from the latest USAC recipient profile for each site, summed across the BEN's roster. **Weighted average discount rate** weights each site's discount by its student enrollment. **Recipients** counts distinct funded recipient sites per BEN per year. State tables aggregate BEN spend by each BEN's primary state (where most of its recipient sites are located) and rank states by spending per NSLP student.

## Geographic assignment

Each billed entity is assigned to a single congressional district — using 119th Congress boundaries from the U.S. Census Bureau TIGER/Line 2024 shapefiles — based on whichever district contains the largest number of that BEN's recipient sites, located by their USAC-reported coordinates. For BENs with no usable coordinates, the district listed in the organization's USAC profile is used as a fallback.

## What is not included

FY2026 is excluded from all totals and charts because the funding year is still in progress — applications are still being reviewed and commitments are still being issued. The E-Rate invoices dataset (USAC `jp1u-tj8h`), which records actual disbursed dollars at the invoice level, was not used; all amounts here are authorized commitments from the FRN Status dataset, the standard measure used in E-Rate policy research.

## Key terms

**Billed Entity Number (BEN)** — the unique identifier USAC assigns to each organization that files an E-Rate application. A single school district, library system, or consortium is one BEN, even if it serves dozens of individual buildings. All funding figures are aggregated at the BEN level first, then rolled up to the congressional district or state. BEN-level totals represent the exact authorized disbursement to that organization; per-recipient-site figures are estimates derived by dividing each FRN line item's post-discount cost equally among the sites it covered.

**Study Area Code (SAC)** — a legacy identifier used by some telecom carriers in E-Rate filings to identify the geographic service territory of a particular circuit or connection. SACs appear in raw USAC data but are not surfaced in these reports, which use BENs and recipient-site coordinates as the primary geographic keys.

*E-Rate Spending Statistics 2020-2025: Broadband in Schools and Libraries*

NATIONAL SUMMARY

*FY2025 disbursement totals are incomplete — many invoices are still being paid. Large districts (e.g. Los Angeles Unified) may show substantially lower FY2025 figures than their true annual totals.*

*National Summary by Funding Year*

<b>Year</b>	<b>Total</b>	<b>BENs</b>	<b>Students</b>	<b>NSLP</b>	<b>Wtd Avg Disc</b>

Sources: USAC Open Data — FCC Form 471 FRN Status (qdm-p-ygfr), total authorized disbursements per billed entity. Student and NSLP counts from latest USAC recipient profile; weighted average discount rate weights sites by enrollment. FY2025 figures are incomplete (invoices still being paid). Technology Policy Institute.

State Summary — FY2025 - INCOMPLETE

FY2025

FY2025 disbursement totals are incomplete — many invoices are still being paid. Large districts (e.g. Los Angeles Unified) may show substantially lower FY2025 figures than their true annual totals.

Sources: USAC Open Data — FCC Form 471 FRN Status (qdm-p-ygrf), total authorized disbursements per billed entity. Student and NSLP counts from latest USAC recipient profile; weighted average discount rate weights sites by enrollment. FY2025 figures are incomplete (invoices still being paid). Technology Policy Institute.

*Column Definitions****National Summary Table***

---

**Year**

Funding year (FY2020–FY2025).

**Total**

Sum of authorized disbursements across all billed entities nationally.

**BENs**

Count of billed entities with disbursements greater than zero in that year.

**Students**

Sum of enrolled students (latest USAC profile) across all BENs active in that year.

**NSLP**

Sum of National School Lunch Program students across those BENs.

**Wtd Avg Disc**

Enrollment-weighted average E-Rate discount rate across recipient sites.

***Top 50 Billed Entities (per year)***

---

**#**

Rank by total BEN disbursements in that funding year.

**Billed Entity**

Organization name (school district, library system, or consortium).

**St**

Primary state where the BEN has the most recipient sites.

**Total**

Total authorized disbursements to that BEN in the funding year (entity-wide, all service types).

**Broadband**

Disbursements for Category 1 services — see Service-Type Summary below.

**Equipment**

Disbursements for Category 2 services — see Service-Type Summary below.

**Stu**

Total students enrolled at recipient sites (latest profile).

**NSLP**

Total NSLP-eligible students at recipient sites.

**Disc**

Enrollment-weighted average discount rate for the BEN's recipient sites.

**Recip**

Count of distinct funded recipient sites for that BEN in the year.

**\$/Stu, \$/NSLP, \$/Recip, Stu/Rec**

Total divided by students, NSLP students, or recipients; students per recipient.

**PDF**

Link to the billed-entity funding report on Google Cloud Storage. When a BEN appears in multiple regional report units, the link points to the report with the most pages (most complete recipient roster).

*Column Definitions (continued)***Service-Type Summary — Broadband & Equipment****Broadband (Category 1)**

Sum of authorized disbursements for: Voice, Telecomm Services, Data Transmission and/or Internet Access.

**Equipment (Category 2)**

Sum of authorized disbursements for: Internal Connections, Basic Maintenance of Internal Connections, Managed Internal Broadband Services.

Category one services include telecommunications, telecommunications services and Internet access. Category two services include internal connections, basic maintenance of internal connections and managed internal broadband services.

Broadband and Equipment columns do not sum to Total — other service types (e.g. unspecified legacy categories) may remain in Total but outside these two buckets.

**State Summary Tables (per year)****State**

U.S. state or territory; tables sorted by \$/NSLP (highest first).

**Total**

Sum of BEN disbursements for BENs whose primary state matches.

**Broadband / Equipment**

Category 1 and Category 2 disbursement subtotals aggregated the same way as the Top 50 tables.

**BENs**

Count of billed entities with disbursements in that state.

**Students / NSLP**

Total enrollment and NSLP counts for all recipient sites in the state.

**Recip**

Distinct funded recipient sites located in the state for that year.

**\$/Recip, \$/Stu, \$/NSLP**

State total divided by recipients, students, or NSLP students. Total row uses summed numerators and denominators.

**PDF**

Link to the state schools & libraries report on Google Cloud Storage (where a single report exists for that jurisdiction).
